

MOBILE APPS DEVELOPMENT QUESTIONNAIRE

To be able to exact on your requirements, we require that you fill-up this questionnaire and send it to sales@webdesignphils.com:

Name: _____
Title: _____
Company: _____
Address: _____
Landline/Mobile: _____
Email: _____

1. What operating system (OS) is needed (ie. Android, iOS, both)?
2. Oldest OS version you wish the web apps to support (optional)?
3. What's the purpose of the mobile apps (e.g. delivery tracking, task management update, chat, etc.)? Kindly describe in detail.

4. Please describe your target market (e.g. our company only, B2B, global, etc.)

5. Do you have a wireframe already?
- a. If NO, do you want us to create the wireframe (wireframing are charged separately), OR do you want us to go directly to mobile apps design/ development prototyping and do the changes from there.
 - b. If YES, can you provide us a copy so we can determine the technical operational flow or business process flow?

6. How much is your intended budget for this mobile apps? This is required for our project management that strictly adheres to team resource allotment, and project phasing that should meet the project timeframe.

7. When do you intend to start this mobile apps project?

8. When do you intend to launch the initial version?

NOTE:

- a. Mobile apps (once finished) will have to undergo *alpha testing*, *closed-beta testing* and *open-beta testing*. Those 3 testing period could take from 6 months to 1 year depending on your volatility of or unpredictability on your decision as to whether a feature on adjustments that suddenly pops-up in your minds should immediately be incorporated (or included on next versions).
- b. During the open-beta testing, it can be rendered as initial launch already.

I, who have affixed my name and signature below, representing the company stated above, have freely and voluntarily provided the information stated above to the best of my ability.
